Secondary education, generalized courses, professional orientation, personal development

My languages

- French - *Native*
- English - *Read/Write*

My interests

- Basketball
- Travel
- Cinema

My recent projects

- Mappeos (<https://mappeos.gleemy.fr>) artisan finder for customers. Users here are customers, companies agents and admins and administrators that have a corresponding dashboard to manage operations. I built this app with NextJS. I use PostgreSQL for databases, Drizzle ORM to connect to the database, Clerk for user management, Redux Toolkit and Zustand for state management, MappBox for address suggestion, Framer for animations.
- HarmonyCar (<https://harmonycar.fr>) app for car certification requests and other car requests. Build with NextJS landing and dashboard for admins and customers and AdonisJS for API.
- Carporea (<https://carporea.fr>) website for selling Solars Carports in France, I built a landing page, administration dashboard for commercial users with NextJS. I integrate YouSign for user signatures to generate commands with the JsPDF library.
- And many other projects if you want to see it, let me know.
