Phone: **(+237) 658 172 868 / (+237) 650 427 649**

Email address: **ronaldtchuekou@gmail.com**

My Goal

Web developer with over ten years' experience, I worked in several private and public organizations before becoming self-employed. I have a perfect command of the various Web and mobile languages I use, and I'm especially adept at solving complex problems. I'd now like to put my knowledge and know-how to good use in a stimulating job offering great challenges and long-term career development.

Skills

- Web and mobile languages (HTML, CSS, JavaScript, TypeScript)
- Frameworks and libraries (React, React Native, Angular, Next.js, Nest.js, Express Js, Material UI, Firebase, Supabase, Clerk, MongoDB, MySql, PostGreSQL, Expo etc…)
- Style libraries (Bootstrap, TailwindCSS)
- Good communication and team skills
- Best practices in project versioning management with Github
- Solve complex problems reliably and optimally.
- I'm a very curious person and adapt easily to new contexts.

Experiences

Full-Stack developer at AGYL TECH

Nov 2023 - Now (Full Remote at Douala, Cameroon)

Rules:

- Plan tasks (sprints) for a given project.
- Design data models for all customer and internal projects
- Learn about companies' needs and offer them various options to meet their requirements
- Build robust FULL REST APIs with dedicated Swagger api generation
- Build web and mobile applications while respecting best practices and code conventions
- Maintain and improve the functionality of existing projects
- Implementing mobile applications with React Native
- Collaborate with various internal teams at client companies
- Manage administration of virtual machines (VPS) for continuous application deployment
- Diagnose anomalies and solve problems for customers
- Keep abreast of the latest developments and computer technologies

Junior Full-Stack Developer at AGYL TECH
